SUMMARY

Software Engineer with 3+ years of experience building scalable SaaS platforms, RESTful APIs, distributed systems, and real-time applications using Node.js and React. Specialized in backend architecture, microservice architecture, and system design, with a strong focus on designing high-performance, reliable, and cloud-native applications. Experienced in containerization (Docker), CI/CD pipelines, and cloud deployment on AWS to ensure high availability, scalability, and performance optimization. Strong expertise in API development, authentication & authorization (JWT, OAuth), and building maintainable, production-ready systems.

SKILLS

● Frontend Development	JavaScript, TypeScript, React, Next.js, Redux Toolkit, TanStack Query, Tailwind CSS, HTML5, CSS3
● Backend Development	Node.js, Express.js, Django, Laravel, REST APIs, RESTful APIs Design, Authentication and Authorization, JWT, OAuth, Microservices Architecture, Distributed Systems, System Design, API Development
● Databases & Storage	MongoDB, MariaDB, MYSQL, Redis, Cloudinary
● Tools and Platforms	Git, GitHub, Vercel, Postman, Swagger, Agile, Scrum, AI Platforms and Tools
● DevOps and Cloud	AWS (EC2, S3, RDS), Ramnode, Docker, Docker Compose, Nginx, GitHub Actions, CI/CD Pipelines, Kubernetes(basic), TurboRepo (Monorepo), PNPM Workspaces, Prometheus, Grafana, Cloud Development
● AI & DevTools	Cursor AI, Claude Code, ChatGPT

PROJECTS

Recipe Sharing App

- Designed and implemented RESTful APIs for recipe management and user interactions
- Optimized database queries and API performance to improve response time and scalability
- Implemented community interaction features including rating, commenting, and categorization
- Followed modular backend architecture for scalability, maintainability, and performance

Google Drive Clone (File Storage & Sharing Platform)

- Designed and implemented RESTful APIs for file upload, download, sharing, and access control
- Implemented secure authentication and authorization using JWT for user-based access management
- Developed features like file/folder management, sharing permissions, and real-time updates
- Integrated cloud storage handling and optimized file upload/download performance

WORK EXPERIENCE

Mindfire Solutions (Remote | WFH)

Senior Software Engineer

Feb 2026 – Present

- Standardized the codebase into a TurboRepo + PNPM monorepo, improving build times by 30% and enabling consistent dependency management across API, worker, and frontend services.
- Automated CI/CD pipelines with GitHub Actions and established monitoring using Prometheus and Grafana, reducing deployment errors by 50% and ensuring production reliability.
- Improved system performance and reduced API response time by ~25% through backend optimization

Mindfire Solutions (Remote | WFH)

Software Engineer

Mar 2024 – Jan 2026

- Designed and optimized RESTful APIs, improving system performance, and reducing response time.
- Reduced API response time by 20% by optimizing database queries and caching strategies
- Improved application reliability and user experience for 1000+ users with offline-first capabilities
- Developed secure authentication mechanisms using JWT and OAuth, ensuring seamless user access while strengthening data protection.
- Optimized backend architecture, refining database queries, and API interactions to enhance scalability and reduce response times by 70%.
- Implemented offline-first capabilities with Indexed DB and Service Workers to enhance user experience and reliability.

Mindfire Solutions (Remote | WFH)

Associate Software Engineer

Nov 2022 – Feb 2024

- Upgraded legacy application from PHP 5.4 to PHP 8, moto-cms from 1.2 to 3.2, optimizing database queries and ensuring smooth migration by validating workflows in the new environment.
- Implemented secure API integrations with external applications, enabling seamless data exchange and system interoperability.
- Debugged production issues and improved system stability & reliability.

EDUCATION

- Master of Computer Application (MCA) | Trident Academy of Technology | Bbsr, Odissa | CGPA- 9.33 | 2020-2022
- Bachelor of Computer Application (BCA) | Trident Academy of Creative Technology | Bbsr, Odissa | CGPA-8.41| 2017-2020

CERTIFICATION

- DevOps & Cloud Computing Certification – PW Skills

ACHIEVEMENTS

- Rising Star Award- Mindfire Solutions (Sept-2024)
- Best Performance Award- Mindfire Solutions (Feb-2026)
